Module 2 Cheat Sheet - Introduction to Linux Commands

Getting information

1. 1
1. date
Copied!

Return your user name:
1. 1
1. whoami
Copied!
Return your user and group id:
1. 1
1. id
Copied!
Return operating system name, username, and other info:
1. 1
1. uname -a
Copied!
Display reference manual for a command:
1. 1
1. man top
Copied!
List available man pages, including a brief description for each command:
1. 1
1. man -k .
Copied!
Get help on any command (for eg: curl):
1. 1
1. curlhelp
Copied!
This provides a brief overview of the curl command's usage and options.
Return the current date and time:

about:blank 1/8

Navigating and working with directories

List files and directories by date, newest to last:
1. 1
1. ls -lrt
Copied!
Find files in directory tree that end in .sh:
1. 1
1. find -name \'*.sh\'
Copied!
Return path to present working directory:
1. 1
1. pwd
Copied!
Make a new directory:
1. 1
1. mkdir new_folder
Copied!
Change the current directory:
Up one level:
1. 1
1. cd/
Copied!
To home:
1. 1
1. cd ~` or `cd
Copied!
To some other directory: cd path_to_directory
Remove directory verbosely:
1. 1
1. rmdir temp_directory -v
Copied!

Monitoring system performance and status

List selection of/all running processes and their PIDs:	
1. 1	
1. ps	
Copied!	
1. 1	
1. ps -e	
Copied!	
Display resource usage:	
1. 1	
1. top	
Copied!	
List mounted file systems and usage:	
1. 1	
1. df	
Copied!	
Creating, copying, moving, and deleting files:	
Create an empty file or update existing file's timestamp:	
1. 1	
1. touch a_new_file.txt	
Copied!	
Copy a file:	
1. 1	
<pre>1. cp file.txt new_path/new_name.txt</pre>	
Copied!	
Change file name or path:	
1. 1	
<pre>1. mv this_file.txt that_path/that_file.txt</pre>	
Copied!	
Remove a file verbosely:	
1. 1	
1. rm this old file.txt -v	

about:blank 3/8

Copied!

Working with file permissions

Change/modify file permissions to 'execute' for all users:

1. 1

chmod +x my_script.sh

Copied!

Change/modify file permissions to 'execute' only for you, the current user:

1. 1

chmod u+x my_file.txt

Copied!

Remove 'read' permissions from group and other users:

1. 1

1. chmod go-r

Copied!

Displaying file and string contents

Display file contents:

1. 1

cat my_shell_script.sh

Copied!

Display file contents page-by-page:

1. 1

1. more ReadMe.txt

Copied!

Display first 10 lines of file:

1. 1

1. head -10 data_table.csv

Copied!

Display last 10 lines of file:

1. 1

1. tail -10 data_table.csv

Copied!

Display string or variable value:

```
1. 1
2. 2
```

```
    echo "I am not a robot"
    echo "I am $USERNAME"
```

Basic text wrangling

Sorting lines and dropping duplicates:

Sort and display lines of file alphanumerically:

```
1. 1
```

sort text_file.txt

In reverse order:

1. 1

sort -r text_file.txt

Drop consecutive duplicated lines and display result:

1. 1

uniq list_with_duplicated_lines.txt

Displaying basic stats:

Display the count of lines, words, or characters in a file:

Lines:

1. 1

1. wc -l table_of_data.csv

Words:

1. 1

wc -w my_essay.txt

Copied!

Characters:

1. 1

wc -m some_document.txt

11/8/24, 2:38 PM about:blank

Copied!

Extracting lines of text containing a pattern:

Some frequently used options for grep:

Option	Description
-n	Print line numbers along with matching lines
-с	Get the count of matching lines
-i	Ignore the case of the text while matching
-v	Print all lines which do not contain the pattern
-w	Match only if the pattern matches whole words

Extract lines containing the word "hello", case insensitive and whole words only:

```
1. 1
```

```
    grep -iw hello a_bunch_of_hellos.txt
```

Extract lines containing the pattern "hello" from all files in the current directory ending in .txt:

```
1. 1
```

grep -l hello *.txt

Copied!

Merge two or more files line-by-line, aligned as columns:

Suppose you have three files containing the first and last names of your customers, plus their phone numbers.

Use paste to align file contents into a Tab-delimited table, one row for each customer:

1. 1

paste first_name.txt last_name.text phone_number.txt

Copied!

Use a comma as a delimiter instead of the default Tab delimiter:

1. 1

1. paste -d "," first_name.txt last_name.text phone_number.txt

Copied!

Use the cut command to extract a column from a table-like file:

Suppose you have a text file whos rows consist of first and last names of customers, delimited by a comma.

Extract first names, line-by-line:

1. 1

about:blank 6/8

about:blank

```
1. cut -d "," -f 1 names.csv
```

Copied!

Extract the second to fifth characters (bytes) from each line of a file:

- 1. 1
- cut -b 2-5 my_text_file.txt

Copied!

Extract the characters (bytes) from each line of a file, starting from the 10th byte to the end of the line:

- 1. 1
- cut -b 10- my_text_file.txt

Copied!

Compression and archiving

Archive a set of files:

- 1. 1
- tar -cvf my_archive.tar.gz file1 file2 file3

Copied!

Compress a set of files:

- 1. 1
- 2. 2
- zip my_zipped_files.zip file1 file2
- 2. zip my_zipped_folders.zip directory1 directory2

Copied!

Extract files from a compressed zip archive:

- 1. 1
- 2. 2
- unzip my_zipped_file.zip
- unzip my_zipped_file.zip -d extract_to_this_direcory

Copied!

Working with networking commands

Print hostname:

- 1. 1
- hostname

Copied!

Send packets to URL and print response:

- 1. 1
- 1. ping www.google.com

Display or configure system network interfaces:

- 1. 1 2. 2
- 1. ifconfig
- 2. ip

Display contents of file at a URL:

- 1. 1
- 1. curl <url>

Download file from a URL:

- 1. 1
- 1. wget <url>

Copied!
